

MCPC 1 (BASICS OF CLEANING)

General Description (3 Days Course)

The first ten preliminary tasks are designed to give operatives within the cleaning industry a hands-on training scheme, which allows the operative to master and improve his/her skills in cleaning. Our training methods are simple but effective using two key elements. Practical skills training which allow the candidate to learn through classroom experience and to gain additional underpinning knowledge through classroom sessions well supported with handouts and video.

Course Objectives

- Master all basic cleaning techniques which will enable the participants to be more effective and efficient at the workplace.
- Helping the participants to understand the basic needs with regards to personal and public safety.
- Increasing the participant's awareness for property longevity.
- Able to increase productivity, saving cost and time when carrying out cleaning tasks.
- Master all skills in floor maintenance which will enable the participants to be more effective and efficient at the workplace.
