

MCPC 4 (FLOOR RESTORATION)

General Description (2 Days Course)

By far the most demanding of all the modules. This module concentrates on the most common floor surfaces found within the commercial and domestic environment, and how to prepare and treat each surface for polish application and maintenance. What are the four floor groups and how it affects decision making on the maintenance programme. Our latest wood floor and stone surface machine technology will demonstrate how easy and cost effective the maintenance can be. How and when seals and polishes should be applied to stone surfaces.

Course Objectives

- Able to restore hard surfaces by using the latest methods used in the industry.
- Ability to learn and understand the different types of floor seals and knowing the right sealer to be used to the right type of floor and also how and when to seal the floor.
- Able to re-apply and maintain a mint appearance by polish and spray techniques.
- Master all skills in floor restoration which will enable the participants to be more effective and efficient at the workplace.

Subjects Covered

- **Vitrification (Crystalization)**
- **Re-applying Semi Permanent Seal using Abrasive Disk**
- **Re-applying Semi Permanent Seal for Concrete Floor**
- **Re-applying Semi Permanent Seal using Chemical Stripping**
- **Applying Polish & Maintenance**

Pre-Requisite MCPC 1 (Basics of Cleaning)
